eye-light®

The all-in-one powerhouse for ocular surface health.

eye-light® is built with three elements: the device, from which the treatments get set, and the two terminals—one for OPE® IPL and one for LM® LLLT.

Light Modulation® Low Level Light Therapy LM® LLLT

LM® LLLT is our patented photobiomodulation technology—it works by triggering endogenous heating of both eyelids, stimulating ATP production within mitochondria. It enables us to optimally treat MGD and many other ocular surface pathologies.

LM® LLLT can be leveraged employing three different light frequencies—each with its own unique benefits and use cases.

Red Light

OPHTHALMOLOGY USE: DRY AMD, MGD, CHALAZION, SJÖGREN'S SYNDROME, STYE, BLEPHARITIS, PRE-/POST- REFRACTIVE SURGERY

Blue Light

OPHTHALMOLOGY USE: MICROBIOME STABILIZATION, DEMODEX, BLEPHARITIS, CHALAZION

Yellow Light

OPHTHALMOLOGY USE: DRY AMD, SWELLING REDUCTION, POST-INVASIVE SURGERY (E.G., BLEPHAROPLASTY)

LM® LLLT Benefits

- Fast**
> A treatment lasts 15'
- Painless**
> It grants immediate relief to the patient
- Easy and Safe**
> For the operator
- Plug&Play**
> It doesn't require the operator to be constantly present during the treatment
- Upgradeable**
> Always Up to Date

Optimal Power Energy® Intense Pulsed Light OPE® IPL

Our patented OPE® IPL is the only pulsed light worldwide allowing for usage without any gel—unlike competitors' solutions.

DRY EYE DISEASE, MGD, CLIDE/CLD
