DISPOSABLE ELECTRODES

EUROEGCELECTRODES™

FIAB EUROEGCELECTRODES provide the highest quality and performance during ECG test, stress test, long and short monitoring, holter test. FIAB electrodes are available in different shapes and sizes. Solid gel has a special formula that improves adhesion and easy application. Liquid gel electrodes allow a quick and stable ECG tracing. Adhesive backing is made in foam or not woven. Connection are standard snap or 4 mm banana adapter. Carbon snap electrodes are excellent for use with RX and MRI. A complete line of prewired electrodes are specially designed for sensitive skin of neonates and paediatric patients. Conductive adhesive provides an excellent ECG reading and the soft medical foam or the not woven with a sensitive adhesive ensure a secure comfortable contact.

F9005/24SSC	spare metallic chest, Ø 24mm, Silver/Silver Chloride	
F9006SSC	spare metallic chest, Ø 30mm, Silver/Silver Chloride	
F9007	spare rubber ball chest for series: F9003, F9009, F9016	
F9007P	spare rubber ball chest for series: F9002, F9008, F9015	

PATIENT CABLES

FIAB manufactures a wide range of ECG patient cables with direct connection to the main part of devices present on the market. Patient cables are provided with 4 mm plugs, snaps or pinches.

CABLES WITH MOULDED MANIFOLD

F8000 series
small moulded manifold
4mm plug connection

F8000 series
small moulded manifold
snap connection

CABLES WITH INSPECTABLE MANIFOLD

F6000 series
small manifold
4mm plug connection

F6000P series
small manifold
pinch connection

F5000c series
large manifold
snap connection
