quality enhances lifetime

R-220 SE: Your most important benefits

Easy and safe

- Intuitive operation of the product and its integrated vacuum controller
- Excellent handling by large and easy readable display
- Fast, easy and safe operation
- Easy flask handling due to the unique flask coupling
- Safe handling and spring-loaded valves protect the glass

Customized

- Experience the best glass set up for every application
- Extended functionality with a wide range of accessories
- Upgrade automatization to your needs
- Expand the functions of your system at any time
- Low operation costs through integration of vacuum pump and chiller

Durable

- Long life time due to exclusive use of corrosion-free stainless-steel
- Product protection by use of highly chemical resistant materials
- Trouble-free operation thanks to robust industrial valves
- Highest safety due to coated glassware
