

Comfort and well-being contribute to recovery. Stiegmeyer sets the standards: with a clinic bed which offers patients and personnel impressive qualities: Vivendo – a series of beds for all requirements. Modular construction and a wide range of equipment features make Vivendo the all-round bed. From standard – to optional features. Efficiency, profitability and design – that's how Vivendo makes an impression.

**Bed making made easy.**  
Storage surface for blankets and pillows.

**Extended mattress base.**  
Integrated bed extension, the mattress base can be extended up to 2.20 metres.

**Comfortable position.**  
Mattress base in four sections with numerous adjustment possibilities.

**Easy to clean and maintain.**  
Removable steel mesh base.

**Always in the best position.**  
Backrest meets DBFK recommendations.

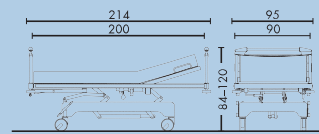

**Quicker access to patients.**  
Removable head section.

**All-round protection.**  
Plastic fenders and wall deflection rollers.

**Easy to move.**  
Ball bearing smooth running castors.

**Height adjustment between 43 and 82 cm.**  
Via a hydraulic foot pump or motor.\*  
Vivendo is available from the wholly mechanical to the fully motorised model.

\* Additional equipment

### EFFICIENCY in care

The highest quality care for patients – under all conditions. With tested equipment features and innovative concepts, Vivendo is raising the efficiency of care giving.

**Standard.** Integrated bed extension lengthens the bed 20 cm more.

**Practical.** Whether for bed making or for doctors rounds – the bed stripper is the ideal storage place for pillows and blankets.

**Hygienic.** The extendable, 3 part ABS plastic mattress base cover is easy to clean and saves time\*.

**Robust.** Two sleeves located on the inside for inserting I.V. stands and patient's lifting poles.

**Mobile.** The bedside table transport system "piggybacks" the night table. Easy to move, simplifies transport.

### TECHNOLOGY which gives more

Vivendo – technology that speeds up working processes. Technology, that guarantees the highest standard for stability and safety. Technology with a long lifetime. That makes Vivendo a long term investment.

**Patented.** The European wide patented decoupling feature of the mattress base allows the patient to be immediately placed in the shock position in the case of emergency – without power or batteries.

**Safe.** The control box enables all electric adjustment functions to be selectively blocked. During transport of the patient, operation is battery powered.\*

**Stable.** Safe lying and sitting positions: extendable backrest meets DBFK recommendations. Emergency lowering of the backrest can be carried out on both sides of the bed.\*

**Protected.** The wall deflection rollers (also available with vertical action) and plastic fenders cushion against collisions, even when curves are taken quickly.

**Independent.** Equipped with electric adjustment possibilities. Control of the most important bed functions using the handset.

### DESIGN for well-being

Well-being is a gentle but important factor for success in the recovery process. Vivendo distinguishes itself through an optimised balance between medical care, ergonomics and aesthetics.

**Harmonious.** Crystal white or argen-tum plus (silver) – Vivendo is available in two standard colours. Can be combined with a wide range of colours for head and foot sections.\*\*

**Tidy.** The one piece rounded ABS undercarriage cover protects against dirt and is easy to clean\*.

**Functional.** The removable head section provides easy access to the patients. Make your selection based on Stiegelmeyers` colour palette and your requirements.

**Flexible.** Simple, quiet movement on smooth running 150 mm castors. Choose from three different types of castors.\*
