 The World Leader in
 Hand-Carried Ultrasound

TITAN™

TITAN™

Amazing Imaging Capabilities. Advanced technologies, including pulsed wave Doppler, directional color power Doppler, Tissue Harmonic Imaging and M-mode, make TITAN suitable for a wide range of clinical applications. Its all-digital LCD screen displays high-resolution images when and where you need them, improving diagnostic confidence and providing better control for image-guided procedures, resulting in improved patient care.

Complete Flexibility. TITAN can be used as a grab-and-go solution when you need speed and portability, or in the Mobile Docking System when you need the stability and functionality of a cart-based system. Triple Transducer Connect (TTC) lets you select and switch from a complete family of transducers to perform a variety of procedures quickly and seamlessly. The TITAN system's flexibility enables the user to easily and economically upgrade software, hardware and chipsets.

Network Compatibility. The TITAN system integrates easily into your existing network via composite video, S-video, USB, VGA or Ethernet. SonoSite also provides SiteLink DICOM options to easily move images into your PACS network. TITAN offers printing capabilities and industry-standard CompactFlash memory with high capacity for on-board information storage. Its flexible connectivity protects your investment as industry standards change in the future.

The SonoSite® TITAN is designed for those who require the features and functionality of a traditional ultrasound system, but the mobility and durability that only SonoSite can deliver. The innovative TITAN system offers the amazing image quality and technical capabilities of cart-based machines with the ease and flexibility of a hand-carried system.

Quality Transducers. SonoSite has developed a wide variety of lightweight, incredibly durable transducers for use with the TITAN. From monitoring a pregnancy to detecting a vascular disease, SonoSite has a transducer for whatever your specialty, guaranteed to withstand the toughest conditions.

Easy Integration. SonoSite makes it easy to introduce TITAN into your department or practice with customized installation and hands-on training programs. Furthermore, the TITAN system has an intuitive interface that is easy to use, allowing you to focus on your patient. The optional Total Warranty Protection service covers systems and transducers against damage, loss and even theft. And if you should need a replacement, we can put one in your hands within 24 hours.
